Master - Akira Nitsche

OMBRE POWDER BROWS

MACHINE CONVERSION

OMBRE POWDER BROWS is one of the newest techniques in the world of permanent makeup. The technique is currently extremely popular because it's extremely versatile and gives beautiful healed results on all skin types & -colors.

With the OMBRE POWDER BROWS effect we can create a soft or more intense powder effect in the skin that can define the eyebrow shape and overall appearance of the brows.

The versatility of this technique is infinite: you can vary in the look that you want to create for your client: dark, intense, strong, defined "instagram" brows, or natural, soft and 'airy' powder effect. With this technique, the natural browshape can be accentuated and any asymmetry can be corrected.

The machine technique is the perfect technique for Brow Artists that want to master the best and most refined technique. As "simple" as it often looks, the technique is very "specific". Good understanding of the various needle configurations, needle lengths, machine settings, speed and use of correct type of pigments are essential to be able to create ultra-defined and powdery results.

During this conversion training we teach you all the essential elements and skills to master this technique.

TRAINING THE CONTENT

The main focus of this advanced conversion training is teaching you how to work/use PMU machine technique!

Akira will share all her "secrets" of how to build a beautiful ombré effect from light to dark in layers, how to blend these layers and blend them evenly, as well as the popular OUTLINE techniques (in various variants). Machine settings like speed, needles types, lengths and the correct hand movements will be widely explained - together with pigments & color theory associated with this technique to achieve beautiful (!) healed results. The training will contain a theoretical part and a live demo!!!

On the second day, all students will perform a full treatment on their model, during the "live practice". Students will be able to perform the treatment in a very structured and well-organized way, using our unique step-by-step working system.

EXPERIENCE PRE-EDUCATION

This intensive 2-day conversion training is designed for artists who are already doing manual techniques such as microblading and / or microshading or for artists that already do machine technique but that like to start working with OMBRE BEAUTY® by Akira signature machine technique.

As this education is an advanced training, we expect students will already have experience in microblading or PMU field. If your previous education was not completed at OMBRE BEAUTY® Academy, we kindly ask to send a copy of a certificate in the microblading and/or PMU field as proof of experience.

SUPPORT AFTER THE EDUCATION

To offer you support after the live education, you get access to the OMBRE BEAUTY® E-learning platform in which various topics from the live training are included for support.

To be able to work with this technique professionally and as an all-round artist, it is important that you can work on as many diverse skin types, skin conditions and colors as possible. Therefore we created several case studies in the E-learning platform, which you can complete on request. Each case study is designed to help you grow in your skills and has various challenges that you may encounter in real life practice such as working on various skin types, different skin colors, different eyebrow shapes and correction work of old pmu.

In addition to access to the E-learning platform, OMBRE BEAUTY® Academy offers unlimited support via direct contact in whatsapp and / or viber. Here you can stay in touch with your trainer and the academy at all times for questions, ideas and updates.

CONVERSION

PRICING TRAINING

€ 1.250,00
excl. VAT

GROUP TRAINING

€ 600,00
STARTERSKIT

25/26
APRIL

Payment may be done in 2 parts:

1. € 250,- deposit
2. Outstanding amount can be paid 1st day of the training.

DAY 1

PROGRAM
